THE EDITO

**By Daniel Le Coguic**

Daniel Le Coguic is Senior Vice-President Sector Public and Defense and Paris 2024, ATOS, Pilote of the Programme structuring the security of major events and Olympic Games 2024 within the CSF since January 2019, and President of the Alliance for Digital Confidence (ACN).

Bringing trust back to the heart of Artificial Intelligence

For several years now, the companies within the Alliance for Digital Confidence (ACN) have been calling for a French and European vision of Digital Confidence that serves fundamental values and that respects human rights and fundamental freedoms.

DIGITAL SOVEREIGNTY

The Cloud: how do we renew trust

By Mériadec Raffray

Europeans have snapped out of their naivety, and they are now looking for the magic formula to secure their data without foregoing the efficiency of apps backed by American datacenters.

France has what it takes to truly give birth to “the best of both worlds.”

DIGITAL TRANSITION

Predictive analytics in cybersecurity: myth or reality

By Zachary Amos

Companies are finally using a technology that predicts data breaches before they happen — predictive analytics. Like a radar, telling you when an enemy is approaching, predictive analytics is used to try to determine when and where attacks may occur. This technology strengthens companies' defenses and helps them maneuver attacks more intricately. Here is a breakdown of how predictive analytics works in cybersecurity.

CYBER RISKS

The cyber insurance market's search for maturity

By Fabrice Deblock

The young cyber insurance market is trying to find its bearings, which implies fluctuations in price and in the content of its contracts. This instability may discourage some big businesses from taking out such policies. As for smaller businesses, they are currently not even in the market for this type of coverage.

SECURITY & STABILITY IN CYBERSPACE

Submarine cables: the future of the Internet is under the sea

By Richard Dalleau

The 2Africa submarine mega-cable was recently connected to Marseille. This pharaonic project illustrates the geopolitical, economic, and political stakes of this little-known face of the Internet. In the age of the fourth industrial revolution, which is based on data, globalization is hanging by a thread... Or should we say a cable. Here's an overview.
